V250

VULCASEAL PRODUCT INFORMATION AND RANGE OVERVIEW

VULCASEAL[®]

V250

**POWERFUL AEROSOL GROUT SEALER
PROVIDING AN INSTANT 20 YEAR
STAIN PROTECTION.
EASY SPRAY-ON APPLICATION CAN BE
APPLIED IMMEDIATELY AFTER GROUTING.**

PRODUCT DESCRIPTION

Vulcaseal V250 penetrates into absorbent wall and floor grout joints. This process fills the pores and capillaries of the grout with an invisible film of polymers. This process alters the surface tension, creating a repelling effect. This treatment prevents the immediate penetration of water based dirt, oil and grease.

Vulcaseal V250 provides an effective protection against staining. Expected durability, can be up to 20 years dependant on the type of surface and use of the treated material, ie vertical surfaces will have extended longevity, whereas floor grout joints will wear and have variable results.

It is advised to avoid common off-the-shelf household cleaning products, as these can contain harmful caustics and bleaches, which in turn will affect the performance and longevity.
